

## PC-Extender Model PC-USB4

Connect a PC-Extender, model PC-USB4 to a PerfectCue® or PerfectCue Mini in order to control an additional four computers. Our PC-Extender contains 4-USB ports that are triggered by a serial command from the connected cue light. Each port may be enabled or disabled with an on board button, the enabled state being indicated by a small green LED.

For a complete hard-wired solution, the PC-Extender USB ports can be activated by a connected hard-wired transmitter, Model PC-AS2-HW.
